A. H. Nicolay will sail on Friday, at 124 o'clock, 2,841 shares of the Illinois Central Railreal Company Stock, with exception of 562 shares. This is be only stock upon which the assessments are not paid. Assessments have been levied upon 129,091 hares. About 10,000 shares have been purchased for investors abroad within a short time, and as this is last block of stock likely to be placed on the mar ket, the sale is worthy the attention of buyers.

The steamer from Boston to-day took \$847,500 in specie, of which \$515,419 went from this City, \$415,519 shipped by Mr. Belmont, and \$100,000 by Dennistoun, Wood & Co. The Boston banks are drawing some coin from us for balances, but we hear of little or no gold going West. The drain to Atalanta has ceased, and the amount which was sent is making its way back again.

The Cleveland and Toledo Railroad Company adwrise that they are now ready to exchange the old Bonds of that Company for the new 'ssue authorized to be made at the annual meeting in July. The new is secured by a mortgage of the road, and their reimbursement before maturity provided for by a sinking fund of not less than 1 & cent. The Bonds have thirty years to run. When Convertible Bonds are exchanged, the convertible clause is continued in the new Bonds. The whole issue will be about three and

The Committee of the Board of Brokers have had an interview with one or both of the resident Directors of the Central Railroad Company in regard to the question of transfers. It was not satisfactory, although the Director proposed to modify the stringency of the rule by allowing more than one transfer of the same stock during the same day, provided a certificate was taken out in regular form for each transaction. As this would involve a journey to the office of the Trust Company and back to the Transfer agents for each transfer, it is considered but little less embarrassing than the original rule. Farther than this Mr. Faile declines to recede. As the Board of the Central Road have a meeting this week this question will probably be brought before them for final settlement. The Board of Brokers appear determined to strike the stock from their list unless all restrictions to frequent transfers

The excitement in the money-market has measurably mbsided, although there is still some moving of loans. The contraction by the banks is not general this week, and is confined almost exclusively to call loans. As far as we can learn the offerings at bank of the right kind of paper is not nearly equal to the ability to discount. We notice no further change in rates of interset. While many old loans are undisturbed at 5 ?

cent, the new loans are made at 6 27 \$\varphi\$ cent.

In Mr. Assistant Cashier Burke's letter to the Board of Directors of the Mechanics' Bank, dated July 24, making charges against Mr. Cashier Edmonds, he says: "DEC. 16, 1852 .- To-day John Alstyne paid a loan of \$12,500-\$12,000 of which was paid in our old "\$1,000 notes." And again : "On that date unques-" tionably the Cashier having paid the Bank in old "and muilated \$1,000 bills the principal, took ac-"cording to understanding with Mr. Alstyne," &c. Whereas the statement made by Mr. President Knapp,

in The Evening Post of August 7, says : "In the year 1852 Mr. Edmunds used \$12,000 of the old bill circu-" lation, all in \$1,000 notes. The bills were two years "ofterward paid into the Bank by Mr. Edmunds. Here it will be seen is a direct and most material con tradiction in the two statements. Mr. Burke says 1852, while Mr. Knapp says they were paid in by Mr. unds in 1854.

With all due respect to the eminent house sending us the annexed communication we must say we do not see the special absurdity of sales of 30,000 bbls, Pork, and must adhere to our belief that that amount does not vary far from the facts of the case, including of sourse sales for future delivery. There is but one source through which an order for the French Government for provisions would be received in this market, and we are fully authorized to say dis mostly that, up to this date, the French Government has not ordered, either directly or indirectly, a single barrel of park since their former orders of last year were completed—the last of which was delivered on the 28th June last.

Reports of this nature, which have no foundation I's truth, have a tendency, (when wide-spread with a large circulation like your own, to excite wild and randous speculations in pork (the coming season for package), which has already advanced to a price far exceeding that of many previous years. Yeu will oblige us by inserting the above, as we hold ourselves responsible for its truth. Very respectfully yours.

The Free Banking Law of It inois, as it has recently been interpreted by the Bank Department and

cently been interpreted by the Bank Department and by the Supreme Court of that State, requires bank notes of the Free banks, when presented for retemption, to be presented singly and protested singly. has also been decided that notes of less denomination than \$5 may be redeemed in American silver coin, which coin cannot be sold better than 1 \$\psi\$ cent discount. The Banks in this City hold considerable amounts of it, which they cannot use, and many, if not all of them, refuse to receive it in deposit in sums of any magnitude. Under the above interpretation of the law the free currency of Illinois is practically abased 1 \$\psi\$ cent, and by the delay consequent upon presenting each note separately for redemption, the Banks are enabled to sustain a virtual position of suspension of specie payments, without the dishoner attending that position. As no broker can afford to take this currency and send it home for redemption under s...h embarrassments, excepting at a large discount, the commercial public when they need par funds will be obliged to stand a heavy shave. As, bowever, Illinois has now a depreciated currency of its own, and one which will pay the banker large profits, it may drive out the unsecure, irresponsible Georgia shinplasters with which Chicago is cursed, and thus effect one good result. The Legis lature of Illinois should, however, at the next session, amend the Banking Law so that banks should be obliged to redeem their currency actually on presentation, not theoretically only. Their law as now administered is a law for the bankers and not for the people.

The Savannah News says:

The Sevannah News says:

We learn from the superintendent of the depot in Chattanooga, says The Advertiser of Thursday, that in the month of July, there were a hundred thousand bushels of wheat shipped over the Western and Atlantic Railroad to points below—and all this from east and middle Tennessee, not isoluding the vast amount that comes down the east Tennesse and Georgia Railroad intersecting the Atlantic Road at Dalton. And the quantity that will be shipped from Chattanooga for the month of August will reach one hundred and fifty thousand bushels, the average amount being over six thousand bushels daily thus far for the present month. We were at the depot yesterday and were surprised to see the depot so densely crammed with this staff of life—and it was still pouring in and bid fair to bury up the depot men.

sew Bonds. The whole issue will be about three and a half millions, and will be exchanged for the following in the property of The most recent returns, are not by any means of an encounging nature. The true that the receipts of new Cotton in New-Orleans is unprecedentedly large, but that port forms an exception, and notwithstanding praces are fully maintained there, when we take into consideration the advance in the rates of freight. At other points the receipts are light, and the crop generally admitted to be backward. Spinners in this country are sparingly stocked, and should they purchase as their wants justify, the amount of Cotton in this market is barely sufficient to supply them until the new crop arrives freely. They, however, pursue the course of buying from "hand to mouth," in the hope of breaking down prices by wearing out the patience of cellers. Exporters have no inducemen's to enter the market at present, it requiring a full [d. advance in the Liverpool market to bring out purchases made now; and until the aspect of affairs is altered for better or worse, the amount taken for shipment will be immatterial. The immense crops of grain secured in this country and Canada, and the good prospect in England and France will prevent any apprehension to prevail of an adverse influence to cotton from a short supply of breadstuffs. Holders, therefore, swayed by the above reasoning, will not sell at the reduction required, and until one or other parties succumb, the quietness in the market will continue.

Markets.. CAREFULLY REPORTED FOR THE TRIBUNE,

MARKETS-CARFFULLY REPORTED FOR THE TRIBUNE.

sell, as New Children. Private of lists design and company with a sell of the control of the con

serve that all who have invested finds in bed-stock will get, their wits sharpened to-day.

No one will doubt the decline in price, or the cause of it, who pays the least regard to our table of receipts, where they will see that the receipts last week are in excess ever the average, almost enough for a moderate expoly for a whole week. It is true the receipts are low at this season. Still the number—nearly five thousand—stems to be so enormous supply.

The market for the lower grades of Cattle is dull, and as the afternoon advanced it grew more and more so, until sales were made at a positive loss to the owners. The average quantity of stock to-cay is said to be better than in the last several weeks, and corresponding rades of Bullocks, except the best, about halfs cent lower than last week. But very few Cattle sold to-day attentions and some of the best in market sold at that, and Bullocks that will make good market victualing meat sold for 10c., plenty of them.

And this is shough. The farmer can better afford to sell beef at ten this year than twelve cents last year, and that is as much as the drover should ask; if he cannot buy at prices to sell at

And this is enough. Into answer case that your, and there is see at the travely sear than twive costs last your, and there is see at the drever should sake, the cattle alone. We have no symmathy or spreak for any must loose upon the selling prices of in-day. Only those will lose who have brought animals here that any decent farmer would be ashanded to keep at home.

The best dreve in the yards we think are from Sayetic Co., Ky., owned by Paiser a futler. All handsoms there yearned Durksoms that will sverage about 'ij cwr., and sell from 10 to lle, averaging about 850 which will saidly the owner.

The fooliwing these shames, a cycul to list.

To Guger 8 at ±40, 4 to Ware at ±381, 7 to Lawrence at 588, a lot to each, Oswald & Stewart at ±82, and a lot to Anderson ±451.

These were all young cattle and considered fancy prices.
